

EMERGENCY RESPONSE TEAMS (ERT)

ERT training is aimed at high risk industries that need to maintain employee safety, protect plant, equipment and respond to incidents that occur on site.

Industries such as the mining and manufacturing sectors use emergency response teams as an effective response to emergency incidents. Onsite teams are trained to respond to incidents that threaten both human and physical resources. Crews are trained to enable them to work alongside responding Tasmania Fire Service Brigades.

Content

Emergency Response Team training encapsulates a range of competencies and is delivered in a needs based format depending on the types of industrial risks involved. The training includes;

- Hazardous material incidents
- First response to fire incidents
- Fire control and emergency rescue
- Operating breathing apparatus and firefighting pumps

Participants will be trained to work as a team during supervised practical exercises at our training grounds. Our instructors have many years experience within the firefighting industry and participant safety is paramount.

Duration, cost and location are all by negotiation according to workplace special needs.

Course Dates

Please contact our regional consultants to discuss your needs. We will design a course based on your specific industry workplace risks and requirements.
